PRIVCO AI INTEGRATION · SETUP GUIDE

Connect PrivCo to Claude

PrivCo is available in the Claude Connectors Directory. Connect it once with your PrivCo login, then ask Claude about private companies, financials, funding, deals and executives.

Last reviewed 13 October 2026. Steps follow each vendor's documentation as of that date; menus change, so contact support@privco.com if a step looks different.

Before you start

On the PrivCo side

- A PrivCo List Builder or Power account. The AI integration is not included with Researcher.
- Your PrivCo email and password.

On your side

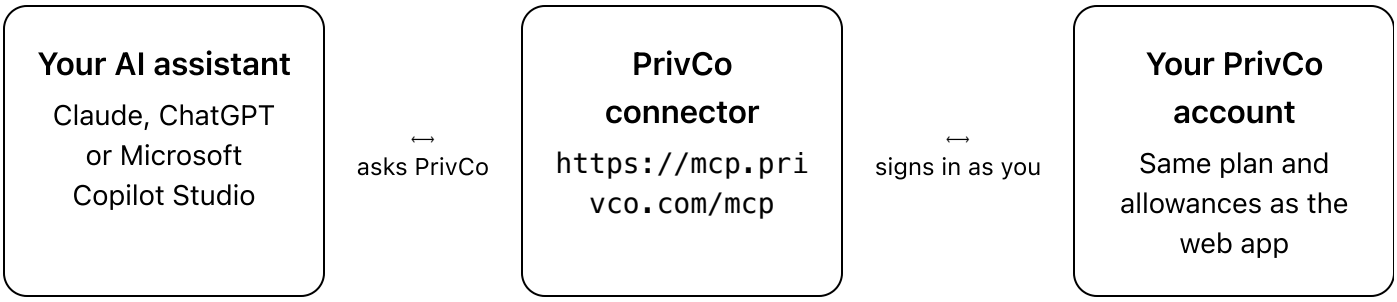
- Claude on the web (claude.ai) or the Claude desktop app. Any Claude plan can use directory connectors.
- On Claude Team or Enterprise, an owner adds PrivCo for the organization first (see “Claude Team and Enterprise” below).
- For Claude Code: Claude Code installed on your computer.

PrivCo server address

`https://mcp.privco.com/mcp`

How it connects

Your AI tool talks to PrivCo through the PrivCo connector, signed in as you. You connect once; after that the AI tool calls PrivCo whenever a question needs it.



The setup at a glance

1. Open the connectors settings
2. Find PrivCo in the directory
3. Click Connect
4. Sign in to PrivCo and click Allow
5. Switch PrivCo on in a chat

Steps

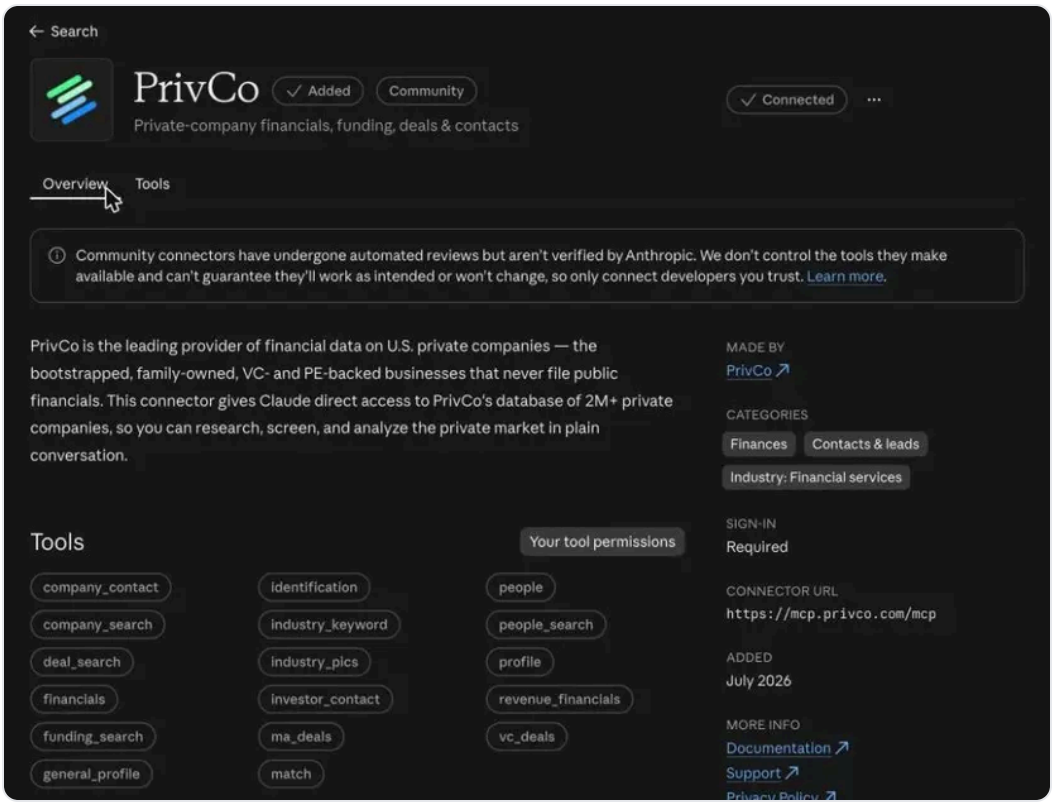
Claude on the web and desktop

1 Open the connectors settings

In Claude, open **Customize**, then **Connectors**.

2 Find PrivCo in the directory

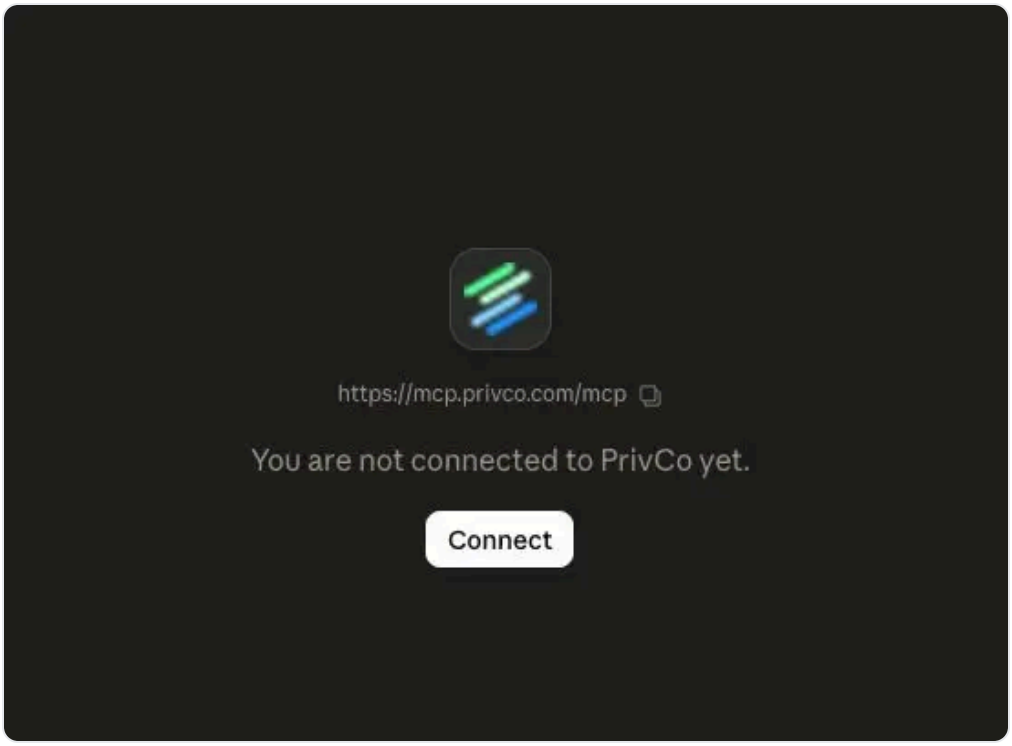
On the **Discover** tab, search for **PrivCo** and open its listing. You can also open the directory directly at claude.ai/directory/privco (https://claude.ai/directory/privco).



The PrivCo listing in the Claude Connectors Directory. It reads Connect until you add it.

3 Click Connect

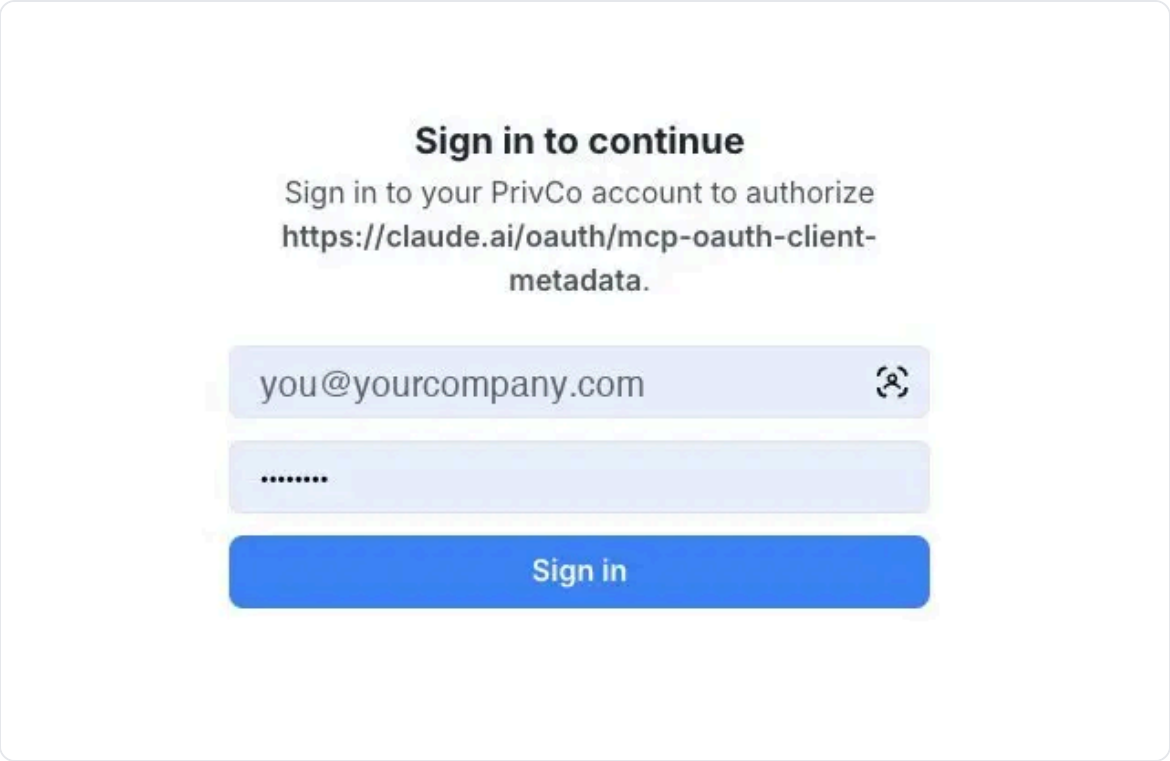
On the PrivCo listing, click **Connect**. A PrivCo sign-in page opens.



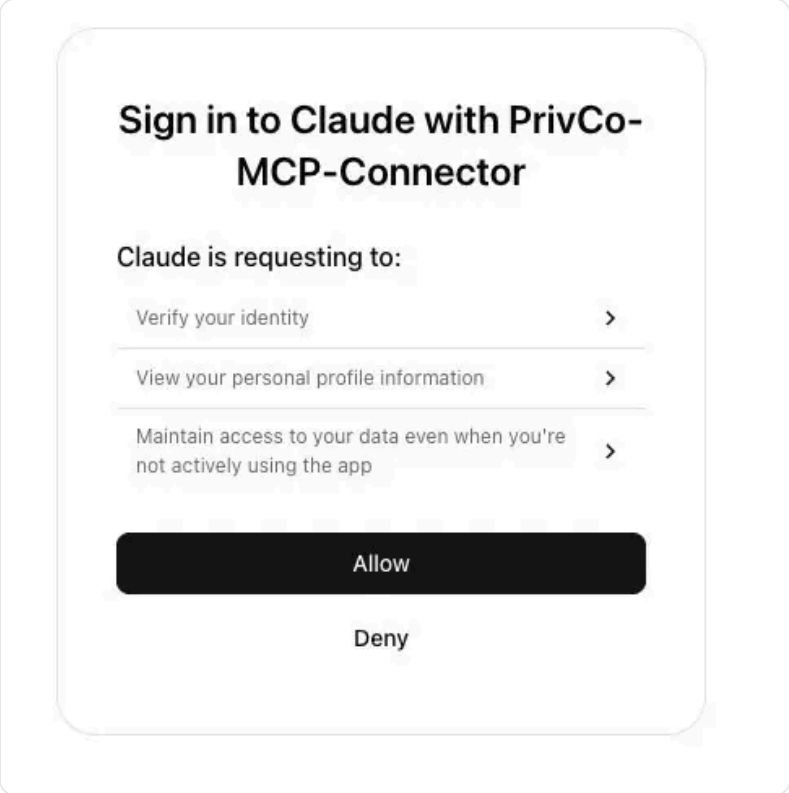
Before you connect: the PrivCo connector with its Connect button.

4 Sign in to PrivCo and click Allow

Sign in with your PrivCo email and password, then click **Allow**. You return to Claude with PrivCo connected.



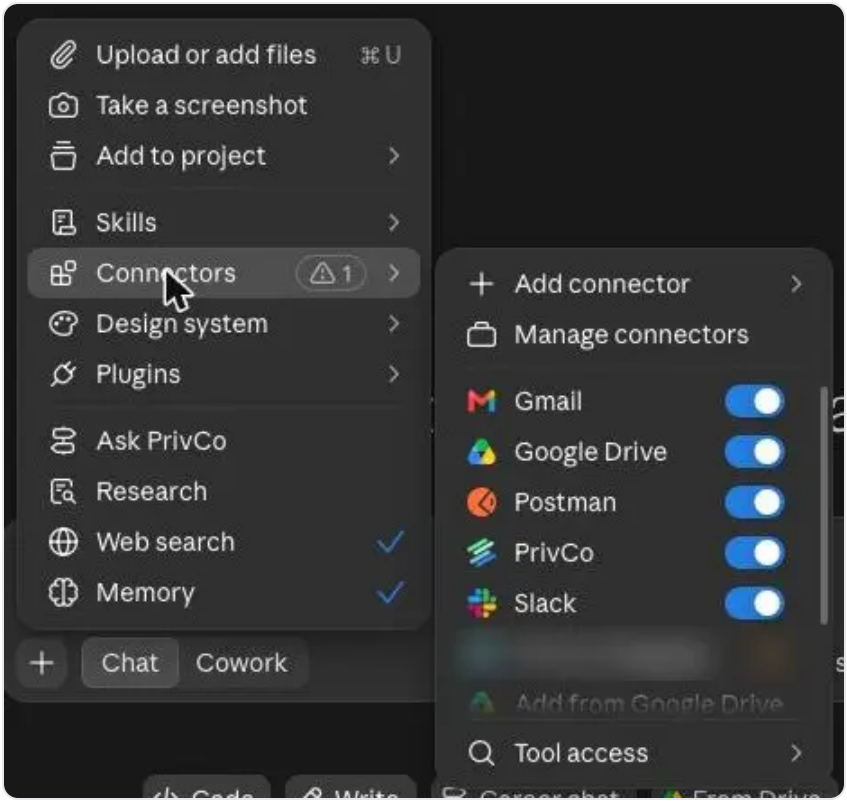
The PrivCo sign-in page.



Approve access: click Allow.

5 Switch PrivCo on in a chat

In a chat, click **+**, choose **Connectors** and make sure **PrivCo** is switched on.



In a chat: + → Connectors → PrivCo switched on.

Claude Team and Enterprise

An owner adds PrivCo for the organization once. Each member then connects with their own PrivCo login.

6 **Owner: add PrivCo for the organization**

Open **Organization settings**, then **Connectors**, and add **PrivCo** from the directory.

7 **Members: connect your own PrivCo account**

Each member opens **Customize** → **Connectors**, clicks **Connect** on PrivCo and signs in with their own PrivCo email and password.

Claude Code (developers)

8 Add the PrivCo server

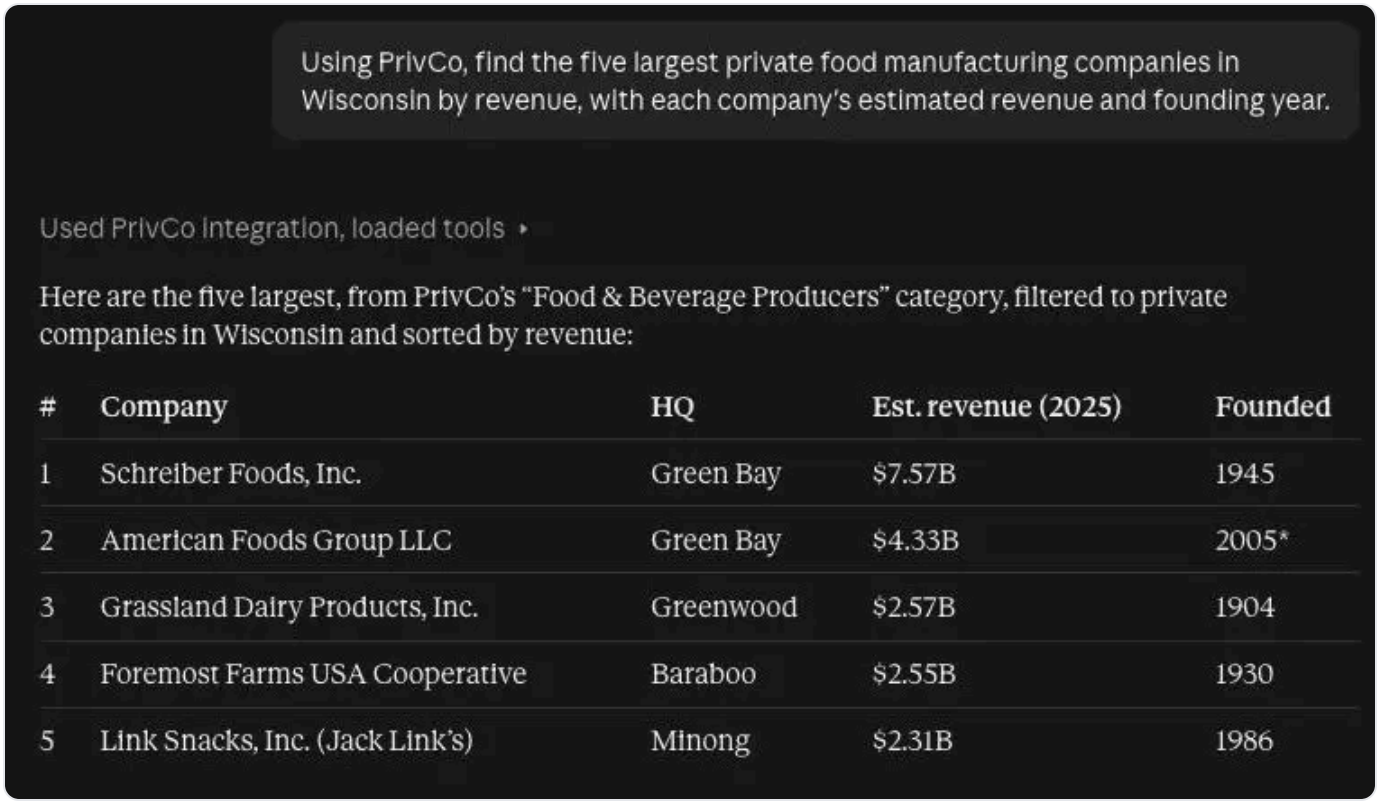
```
claude mcp add --transport http privco https://mcp.privco.com/mcp
```

9 Sign in with /mcp

In Claude Code, run **/mcp**, select **privco** and complete the PrivCo sign-in in your browser.

First prompt to try

Using PrivCo, find the five largest private food manufacturing companies in Wisconsin by revenue, with each company's estimated revenue and founding year.



Claude answering the first prompt from PrivCo data ("Used PrivCo integration").

You should see the AI tool call PrivCo, then answer with figures from the PrivCo profile. AI tools can make mistakes, so check important figures on the PrivCo company profile.

What to ask next

For the largest of those companies, show multi-year revenue estimates and the executive team.

List Series A and Series B rounds in U.S. healthcare software over the last 12 months, with round size and investors.

Which private HVAC services companies in Texas were acquired in the last three years, and who bought them?

More examples by role: privco.com/ai-integration

Your allowance

- The AI integration counts the unique company profiles opened each month: **100** on List Builder and **500** on Power (adjustable on Power).
- Searches, matching and lists do not use profiles. Opening the same company again in the same month does not count again.
- Revealing an email, phone number or LinkedIn profile uses a contact credit. The AI tool asks you before it does.
- When the allowance is used up, the AI tool shows a clear message. It resets each month.
- If your account also has the PrivCo data API, the two share one allowance.

Troubleshooting

The PrivCo sign-in page keeps coming back

Sign out of PrivCo at system.privco.com, sign back in, then connect again. If it still loops, close the tab, open a new chat and repeat the connection step.

The AI tool says PrivCo needs a paid subscription

Your PrivCo plan does not include the AI integration. It is included with List Builder and Power; see privco.com/pricing.

The AI tool says the monthly allowance is used up

Your account has opened its monthly number of company profiles. Searches still work, and the allowance resets next month. Power customers can ask support@privco.com to adjust it.

The AI tool answers without using PrivCo

Mention PrivCo in your prompt, for example "Using PrivCo, …". Check that PrivCo is switched on under **+** → **Connectors** in that chat.

A Team or Enterprise member cannot find PrivCo

An owner must add PrivCo under **Organization settings** → **Connectors** first. After that, each member connects their own PrivCo account.

For IT and admins

- On Claude Team and Enterprise, an owner adds PrivCo once under **Organization settings** → **Connectors**. Members then connect with their own PrivCo login.
- Each person needs a PrivCo List Builder or Power account that includes the AI integration.
- Each person signs in with their own PrivCo account on PrivCo's sign-in page and approves access. No API key is stored in the AI tool.
- All 17 PrivCo tools read data only. PrivCo does not train models on your prompts; your AI provider's settings control training, so turn model-training options off if your policy requires it.
- To turn the AI integration off for a user, email support@privco.com.
